Profile

I am an easy going guy who likes to explore possibilities and find challenges. I am very detail oriented, like to rethink, redesign, rebuild anything keeping in mind that something can always be made better or more efficient. I have experience in a leadership role as well as working solo and in team environments. I am primarily a Dev Ops Engineer with server side application, Database Management, Helpdesk support and Quality Management skills and experience.

Core Qualifications & Experience

- Optimizing Server Deployment
- Optimizing Application Deployment
